

Contents

	<i>Preface</i>	<i>page viii</i>
1	A short introduction to limit order books	1
	PART ONE EMPIRICAL PROPERTIES OF ORDER-DRIVEN	
	MARKETS	7
2	Statistical properties of limit order books: a survey	9
	2.1 Introduction	9
	2.2 Time of arrivals of orders	9
	2.3 Volume of orders	11
	2.4 Placement of orders	12
	2.5 Cancellation of orders	13
	2.6 Average shape of the order book	15
	2.7 Intraday seasonality	16
	2.8 Conclusion	20
3	The order book shape as a function of the average size of limit orders	21
	3.1 Introduction	21
	3.2 Methodology	21
	3.3 The regression model	23
	3.4 conclusion	28
4	Empirical evidence of <i>market making</i> and <i>market taking</i>	29
	4.1 Introduction	29
	4.2 Re-introducing physical time	29
	4.3 Distributions of durations	31
	4.3.1 Empirical evidence of market making	31
	4.3.2 A reciprocal effect ?	33

4.4	Using the lagged correlation matrices	35
4.5	Conclusion	37
PART TWO MATHEMATICAL MODELLING OF LIMIT ORDER BOOKS		39
5	Agent-based modelling of limit order books: a survey	41
5.1	Introduction	41
5.2	Early order-driven market modelling	43
5.2.1	A pioneer order book model	43
5.2.2	Microstructure of the double auction	44
5.2.3	Zero-intelligence	44
5.3	Order-driven market modelling in Econophysics	45
5.3.1	The order book as a reaction-diffusion model	45
5.3.2	Introducing market orders	47
5.3.3	The order book as a deposition-evaporation process	50
5.4	Empirical zero-intelligence models	51
5.5	Some developments in zero-intelligence order book modelling	54
5.6	Conclusion	56
6	The mathematical structure of zero-intelligence limit order book models	57
6.1	Introduction	57
6.1.1	An elementary approximation: perfect market making	57
6.2	Order book dynamics	59
6.2.1	Model setup: Poissonian arrivals, reference frame and boundary conditions	59
6.2.2	Evolution of the order book	62
6.2.3	Infinitesimal generator	64
6.2.4	Price dynamics	65
6.3	Ergodicity and diffusive limit	66
6.3.1	Ergodicity of the order book	66
6.3.2	Large-scale limit of the price process	68
6.3.3	Interpreting the asymptotic volatility	71
6.4	The role of cancellations	72
6.5	Conclusions	73

7	The order book as a queueing system	75
7.1	Introduction	75
7.2	A link between the flows of order and the shape of an order book	76
7.2.1	The basic one-side queueing system	76
7.2.2	A continuous extension of the basic model	78
7.3	Comparison to existing results on the shape of the order book	82
7.3.1	Numerically simulated shape in Smith et al. (2003)	82
7.3.2	Empirical and analytical shape in Bouchaud et al. (2002a)	82
7.4	A model with varying sizes of limit orders	86
7.5	Influence of the size of limit orders on the shape of the order book	90
7.6	Conclusion	94
8	Advanced modelling of limit order books	95
8.1	Introduction	95
8.2	Towards non-trivial behaviours: modelling market interactions	95
8.2.1	Herding behaviour	96
8.2.2	Fundamentalists and trend followers	97
8.2.3	Threshold behaviour	99
8.2.4	Enhancing zero-intelligence models	100
8.3	Limit order book driven by Hawkes processes	101
8.3.1	Hawkes processes	102
8.3.2	Model setup	103
8.3.3	The infinitesimal generator	103
8.4	Stability of the order book	105
8.5	Large scale limit of the price process	106
8.6	Conclusion	108

PART THREE SIMULATION OF LIMIT ORDER BOOKS

111

9	Numerical simulation of limit order books	113
9.1	Introduction	113
9.2	Zero-intelligence limit order book simulator	113
9.2.1	An algorithm for Poisson order flows	113

9.2.2	Parameter estimation	114
9.2.3	Performances of the simulation	116
9.2.4	Anomalous diffusion at short time scales	124
9.2.5	Results for CAC 40 stocks	128
9.3	Simulation of a limit order book modelled by Hawkes processes	130
9.3.1	Simulation of the limit order book in a simple Hawkes model	130
9.3.2	Algorithm for the simulation of a Hawkes process	131
9.3.3	Parameter estimation	133
9.3.4	Performances of the simulation	133
9.4	Market making and taking viewed from a Hawkes-process perspective	138
9.5	Conclusion	140
PART FOUR IMPERFECTION AND PREDICTABILITY IN ORDER-DRIVEN MARKETS		143
10	Market imperfection and predictability	145
10.1	Introduction	145
10.2	Objectives, methodology and performances measures	146
10.2.1	Objectives	146
10.2.2	Methodology	147
10.2.3	Performance measures	148
10.3	Conditional probability matrices	148
10.3.1	Binary case	149
10.3.2	Four-class case	154
10.4	Linear regression	156
10.4.1	Ordinary least squares (OLS)	157
10.4.2	Ridge regression	158
10.4.3	Least Absolute Shrinkage and Selection Operator (LASSO)	162
10.4.4	ELASTIC NET (EN)	166
10.5	Conclusion	168
<i>Appendix A</i>	A catalogue of order types on financial markets	169
<i>Appendix B</i>	Limit order book data	171
<i>Appendix C</i>	Some useful mathematical notions	176

	<i>Contents</i>	vii
<i>Appendix D</i>	Comparison of various prediction methods	186
	<i>Bibliography</i>	202
